Dear Parents:

We want to inform you that we have one confirmed case of methicillin-resistant Staphylococcus aureus (MRSA) at Roxbury High School.

We have been in contact with our local Health Department and all departments, including Buildings and Grounds and Transportation, are taking every necessary step to disinfect, sterilize, and clean all areas on our campus.

The medical professionals handling this case believe that this occurred as a result of a cut and that the infection may have been connected to outdoor sports activities.

At this time, we have no reason to believe that anyone or any part of the high school or the rest of the campus is a source of contagion. Specifically at the high school, we are disinfecting, sterilizing, and cleaning each and every locker and all sports and physical education equipment will be disinfected, sterilized, and cleaned.

Should you have any questions and/or concerns, please do not hesitate to contact us.

Educationally,

Michael A. Rossi, Jr., Ph.D.
Superintendent of Schools
